

**Your Paper's Title Starts Here: Please Centre
Use Arial 14**

Name Surname^{1, a}, Name Surname^{2, b} ... and Last Author^{3, c}

¹Full address of first author, including country

²Full address of second author, including country

³List all distinct addresses in the same way

^aemail, ^bemail, ^cemail

Keywords: List the keywords covered in your paper. A maximum of five keywords can be used.

For the rest of the paper, please use Times New Roman 12 (except captions for Tables and Figures, to be written in Times New Roman 10) using a single space interline and 18 pt. spacing above each new paragraph and no indentation when starting a new line.

Abstract. This template explains and demonstrates how to prepare your camera-ready paper for the 6th Conference of Natural Fibre Composites, Rome 4-7 October 2017. Please make the page settings of your word processor to A4 format (21 x 29,7 cm or 8 x 11 inches), with all margins equal to 2.5 cm.

Introduction

All manuscripts must be in English, also the table and figure texts.

The total length of the paper needs not to exceed 4 pages, including figures and tables. A total number of 4 among figure and tables is allowed (for example, 2 figures and 2 tables, or 4 figures and no tables).

Please insert an abstract, not exceeding 150 words in length, to summarise the aim of the work and its main results.

Organization of the Text

Section Headings. The section headings are in boldface capital and lowercase letters. Second level headings are typed as part of the succeeding paragraph (like the subsection heading of this paragraph).

Page Numbers. Please number the pages of your paper at the page bottom, centred, in Times New Roman 10

Tables. Tables (refer with: Table 1, Table 2, ...) should be presented as part of the text, but in such a way as to avoid confusion with the text. A descriptive title needs to be placed *above* each table, centred, written with Times New Roman, 12, font, as in the example below. Units in tables should be given in square brackets [meV] or in standard brackets (meV).

Table 1 – Mechanical properties of composite laminates (average ± standard deviation)

Insert Table 1

Special Signs. for example , α γ μ Ω $() \geq \pm \bullet \Gamma \{11 \bar{2} 0\}$ should always be written in with the fonts Times New Roman or Arial, especially also in the figures and tables.

Figures. Figures (refer with: Fig. 1, Fig. 2, ...) also should be presented as part of the text. The caption should be self-contained and placed *below* the figure, written as in the example reported below. For best quality the pictures should have a resolution of 300 dpi (dots per inch).

Insert Figure 1

Figure 1 – Optical microscopy image of the structure of a sample

Equations. Equations (refer with: Eq. 1, Eq. 2, ...) should be indented 5 mm (0.2"). There should be one line of space above the equation and one line of space below it before the text continues. The equations have to be numbered sequentially, and the number put in parentheses at the right-hand edge of the text. Equations should be punctuated as if they were an ordinary part of the text. Punctuation appears after the equation but before the equation number, e.g.

$$c^2 = a^2 + b^2. \tag{1}$$

Literature References

References are cited in the text just by square brackets [1]. Two or more references at a time may be put in one set of brackets [3,4]. The references are to be numbered in the order in which they are cited in the text and are to be listed at the end of the contribution under a heading *References*, see example below.
